VASUDEVAN VENKATARAMAN

Lead UX Designer | UX Strategy & Design Operations

About

UX leader with 9 years of experience building scalable design practices, leading cross-functional teams, and delivering enterprise solutions across healthcare, aerospace, logistics, retail, and industrial domains.

Over the past few years, I've helped build UX capabilities from the ground up, hiring and mentoring designers, defining SOPs, improving delivery workflows, and bringing more structure and consistency to how teams collaborate across projects.
I enjoy turning messy requirements into practical experiences, improving how teams collaborate, and bringing clarity to projects that start with more ambiguity than answers.
I enjoy solving messy product problems, improving team workflows, and asking "why does this need six clicks?" more often than most people probably should. I also believe good collaboration, curiosity, and a well-timed joke can make even the most chaotic project discussions surprisingly productive.
Outside of work, I'm usually playing DOTA 2 or Apex Legends, overanalysing game interfaces, or wondering why some products still require six clicks to do one thing.

I care about thoughtful UX, practical workflows, and keeping teams sane when deadlines start doing what deadlines usually do.

Education

B.E - Automobile Engineering (2006-2010)
Madras Institute of Technology.

High School - Computer Science (2004-2006)
Devi Academy

Skills

UX & Strategy

• UX Strategy • Design Operations • Stakeholder Management•
• Product Discovery • Enterprise UX • Information Architecture
• Design Reviews • Workshop Facilitation

Leadership & Collaboration

• Team Mentorship • Cross-functional Collaboration
• UX Governance • Delivery Workflows • SOP Development

Workflow & Prototyping

• Claude • ChatGPT • Cursor • Lovable • AI-assisted ideation
• Rapid prototyping • Documentation workflows

Tools

• Figma • Adobe CC • Miro • FigJam

Work Experience

Minfy Technologies pvt ltd

Lead.UX Designer — May 2023 - Present

- Founded and scaled the company's UX practice from a single-designer setup to a structured, multi-engagement team — defining the operational model, hiring pipeline, and collaboration framework that now supports concurrent enterprise delivery across 5+ domains.
- Designed and implemented a UX delivery system — including SOPs, review cadences, and knowledge-sharing infrastructure — that reduced dependency on individual contributors and enabled the team to scale output without scaling headcount proportionally.
- Reduced dependency on individual designers by introducing shared project visibility and collaborative ownership across the team.
- Led UX strategy and solution design across enterprise domains including Aerospace, Healthcare, Industrial Services, Logistics, Weather Analytics, and Data Platforms.
- Worked closely with product, engineering, and stakeholders to align UX decisions with business priorities and delivery realities.
- Contributed to pre-sales discussions and complex enterprise proposals by helping define solution direction, user workflows, and UX value propositions.
- Led the UX direction for satellite image capture and communication platforms built for aerospace-focused enterprise solutions
- Simplified how the team approached recurring UX problems by introducing reusable workflows and review practices.
- Grew the design team from a solo senior role to a 5-person practice (1 senior, 1 associate, 2 juniors) — establishing structured onboarding, critique cadences, and mentorship practices that maintained delivery quality through each hiring phase.
- Reviewed UX direction across projects to improve usability, reduce rework, and maintain consistency before development handoff.
- Progressed from individual contributor to design lead within the same engagement, taking on hiring, team structure, and org design responsibilities while continuing to own UX strategy across enterprise domains.

Sr.UX Designer — May 2023 - June 2024

Zendrive Technologies pvt ltd

Product Designer — Oct 2021 - Mar 2023

- Revamped the customer journey for the Insurance Qualification Lens (IQL), boosting customer acquisition by 13%.
- Improved publisher satisfaction scores from 3.0 to 4.5, contributing to overall retention and engagement.
- Led a full redesign of the IQL platform, enhancing UX and visual appeal, which drove the onboarding of 3 new publishers to the White Label App (WLA).
- Conceptualised strategies to integrate core modules into Audi's Automated Collision Notification (ACN) system and NerdWallet platforms.

Outliersoft Technologies pvt ltd

UX Designer — Oct 2018 - Oct 2021

Prudential - Pulse, Proteinmetrics, Fed-Ex Aviation

- Designed enterprise healthcare, aviation, and analytics platforms across patient care, risk management, and administrative workflows.
- Led and mentored a small design team, improving delivery quality and turnaround efficiency across multiple engagements.
- Delivered rapid prototypes, high-fidelity experiences, and workflow-driven UX solutions in collaboration with product and engineering teams.
- Contributed to healthcare consultation systems, aviation risk management platforms, and enterprise data-sharing solutions for global clients.

Embark Mobility Labs, Chennai

Jr.Designer/Partner — July 2017 - Sep 2018

- Co-built a mobility product from concept to prototype, contributing to research, UX strategy, interaction design, and investor presentations.
- Participated in early-stage product and business discussions, helping secure initial investment interest.

Amazon, Hyderabad

Team Lead — Oct 2012 - Jul 2017

- Led large-scale publishing operations while managing cross-functional workflows and team performance.
- Mentored team members and improved operational quality metrics through process optimization and structured guidance.
