VASUDEVAN VENKATARAMAN

CLASS: LEAD UX DESIGNER | 9+ YRS IN UX | 15 YRS TOTAL | MINFY TECHNOLOGIES · HYDERABAD

9+ Years in UX

4 Designers led today

7 Designers mentored: 5 at Minfy, 2 at Outliersoft

4 → 2 Days per POC design

LORE ABOUT

Lead UX designer with 9+ years designing digital products across aerospace, healthcare, agritech, logistics and weather analytics. I built Minfy's UX practice from scratch: the team, the SOPs, the design system. I turn messy requirements into flows teams can build from. I'm the one asking "who is this for, and what are they actually trying to get done?", usually just before the meeting ends early.

~65% Faster One Trace features: two weeks to four days

3.0 → 4.5 Publisher satisfaction at Zendrive

+13% Customer acquisition from the IQL journey revamp

+18% Speed and quality of deliveries on Pulse

ABILITIES PROCESSES

- Design thinking
- Requirement gathering
- Primary research

- Figma
- FigJam
- Adobe XD
- Adobe Photoshop
- Adobe Illustrator
- Miro
- Invision
- Balsamiq
- Microsoft PowerPoint
- Microsoft Excel
- Zeplin

QUEST LOG SELECTED PROJECTS AT MINFY

LEGENDARY · AEROSPACE

EARTH OBSERVATION PLATFORM

Solo designer across UX, research and visual design, since January 2025. Search a place, see every satellite pass over it. Government agencies kept coming back, and it was white-labelled for a foreign space agency.

EPIC · SPACE

SUMERIA SPACE

Solo designer. An "Uber for satellites": a marketplace between satellite owners and laser ground stations. 12 weeks, 4 of them for design. It is live, and Stratumetrics came through this client.

RARE · REPAIR & WARRANTY

ONE TRACE

Solo designer who also wrote the requirements. A written spec for every feature cut turnaround from 2 weeks to 4 days (~65%). A second phase has been awarded.

UNCOMMON · DATA MIGRATION

TAPEARK

Solo designer with full control of the design: customer portal and admin console for moving old backup tapes to the cloud. Minfy's first project with a full team. Shipped and running.

EPIC · AGRITECH

VANIX · MYBOVINE

Wrote the PRD, did the first design and mentored two junior designers on a dairy cattle-health app. It shipped, and the client gave Minfy a follow-on project, DigiKhet.

COMMON · HEALTHCARE

GHARPE DIAGNOSTICS

Solo designer. Two apps, customer and technician, for at-home X-ray and ECG tests, designed and prototyped end to end in 16 days alongside one developer.

CAREER NEWEST FIRST

MINFY TECHNOLOGIES pvt ltd

LEAD UX DESIGNER
MAY 2024 – PRESENT

SR. UX DESIGNER
MAY 2023 – APR 2024

- **Joined as the first designer and fourth hire**, and built Minfy's UX practice from scratch. Onboarded and mentored 5 designers, lead 4 today, and am grooming a senior into a lead.
- Built a unified design system for web and mobile as a core member of the pilot product development team. **POC designs that took 4 days now take 2.**
- Wrote the team's design SOPs. Discovery before the SOW, which I put forward, is now how projects start.
- Changed how design and dev work together: the whole team brainstorms before design starts, sketches are reviewed with PM, front end and back end, and developers build from a document and a clickable prototype. **One Trace feature turnaround fell by about 65%, from two weeks to four days.**
- Raised design's share of the standard project timeline to at least double.
- Led UX across Aerospace, Healthcare, Data Migration, Industrial Services and Real Estate. Contributed to proposals for Apollo Tyres, Stanley College (Australia), Max Healthcare and Matson, including POCs for Max Healthcare and Stanley College, each built in under 12 hours.
- Lead the design of a satellite image capture and communication portal for an aerospace client, coordinating users, ground stations and satellites.

ZENDRIVE TECHNOLOGIES pvt ltd

PRODUCT DESIGNER
OCT 2021 – MAR 2023

- Revamped the customer journey for the Insurance Qualification Lens (IQL), **boosting customer acquisition by 13%.**
- Improved publisher satisfaction scores **from 3.0 to 4.5**, contributing to overall retention and engagement.
- Led a full redesign of the IQL platform, which drove the onboarding of 3 new publishers to the White Label App (WLA).
- Conceptualised strategies to integrate core modules into Audi's Automated Collision Notification (ACN) system and NerdWallet platforms.

OUTLIERSOFT TECHNOLOGIES pvt ltd

UX DESIGNER
OCT 2018 – OCT 2021

PRUDENTIAL · PULSE

- Led and mentored a team of 2 designers to design the health care product Pulse, and **improved the speed and quality of deliveries by 18%.**
- Designed and delivered the doctor consultation patient and doctor views, live fitness classes and challenges, via rapid prototypes and high-fidelity mocks.

PROTEINMETRICS

- Devised a file sharing and administrative system for protein analysis, working directly with the core product team, delivered within 4 weeks.

FED-EX AVIATION

- Digitised the Flight Management System. Delivered the Flight Risk Management System (FRMS) and Federal Flight Deck Officer (FFDO).

EMBARK MOBILITY LABS Chennai

JR. DESIGNER / PARTNER
JUL 2017 – SEP 2018

- Started as a designer partner for the product Hoovi, and built it from scratch: research, analysis, concepts, wireframes, then high-fidelity mocks.
- **Presented the prototype to investors and acquired 2 investments.** Involved in strategic product and business decisions, and handled a cross-functional team.

AMAZON Hyderabad · not a design role

TEAM LEAD
OCT 2012 – JUL 2017

- Led a 27 member team for Kindle Publishing, and **mentored 3 employees to improve the rating by 13%.**

EDUCATION

B.E Automobile Engineering
Madras Institute of Technology · 2006–2010

OFF DUTY

Short story writing · Cooking (pizza especially) · People management · Standup comedy · Event and wedding photography · Competitive PC gaming · Tech and gadgets · Ex TNCA cricketer

LOADING-SCREEN TIPS INTERESTING THOUGHTS

TIP
If everyone thinks outside the box, do you think inside the box is the new outside the box?

TIP
If you have to explain it, it's no good (both jokes and design).
